

It is possible to reclaim the positive aspects of the term "Christian" but that means we have to be willing to respond biblically to one another and to this world.

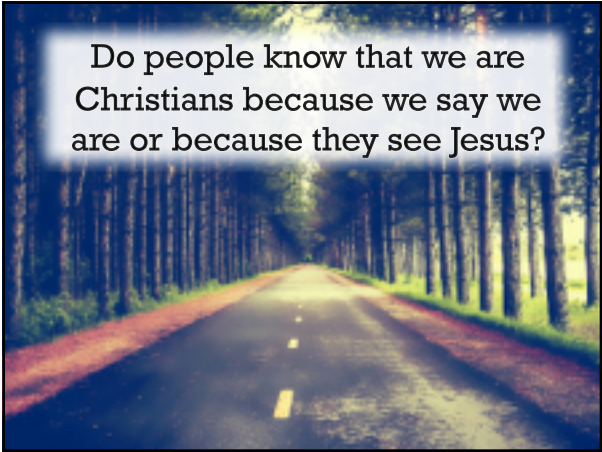

No matter how dark a culture is, God can grow His church and change a person's life forever.

Healthy churches, with healthy Christians, preach the Gospel to all people.

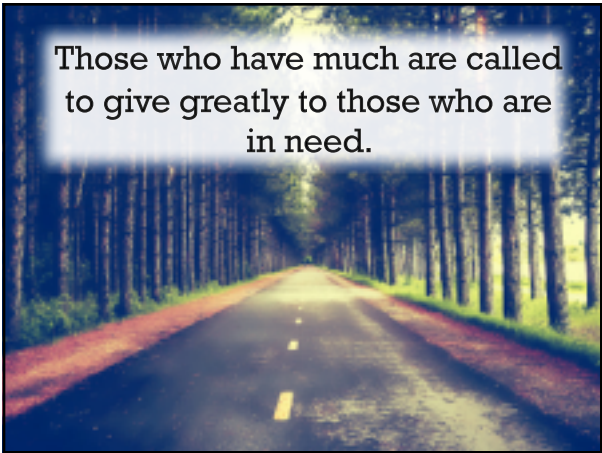

It is in community that God's people see His Spirit work in and change the hearts of His children.

Healthy Churches that encourage healthy Christians are then able to reach unbelievers who trust in Christ.

Do people know that we are Christians because we say we are or because they see Jesus?

Those who have much are called to give greatly to those who are in need.

Spiritual action complements spiritual growth.
